-----

In this work, we have proposed an eco-friendly, power-aware, fuzzy based BS and RS deployment algorithm to maximize the coverage and capacity of the system.

In this paper, a novel sleep-mode base station (BS) selection scheme, namely forced handover, is proposed using the mobile stations ...

Discover high-quality connectors for base station power supplies by Amphenol LTW, ensuring durability and reliable performance.

A standard 3U design enables base station to fit for server rack installation and to operate easily when you use it at various work conditions, such as factories, schools and ...

The simulation results show the superiority of the proposed 5G BS-RS deployment and power scheduling in terms of throughput, coverage ratio, and power consumption.

A novel relay station (RS) deployment scheme and base station (BS) sleep mode algorithm is proposed to minimize the power consumption of eNBs and the evaluation results show the ...

Due to harsh climate conditions and the absence of on-site personnel to maintain fuel generators, the company required a reliable solution to ...

Due to harsh climate conditions and the absence of on-site personnel to maintain fuel generators, the company required a reliable solution to ensure the base station's stable operation and ...

It supports low latency applications such as voice and video, provides broadband connections of both Line-Of-Sight (LOS) and None-LOS (NLOS) between a mobile station (MS) and a base ...

In this paper, a novel sleep-mode base station (BS) selection scheme, namely forced handover, is proposed using the mobile stations as mobile relay stations in order to ...

In response, MIC will conduct institutional improvements that enable: [1] the introduction of land mobile relay stations, [2] the introduction of femtocell base stations and low-power repeaters, ...

Base Station or Relay Station On/Off based on SINR A BS or RS basically consist of 2 powers that is the basic power and transmit power. Basic power is a very small power ...
